ADL Launches Online Hate Index to Detect Antisemitism on Social Media

ADL's new [Online Hate Index \(OHI\)](#) is the first tool to detect and measure antisemitism on social media. It uses artificial intelligence that has been trained by experts in antisemitism and by trained volunteers. OHI offers a clear picture of the state of hate on social media. We will use this tool to hold social media platforms accountable for how well they proactively take down hate and how well their content moderators respond to reports.

For more information, on the OHI antisemitism classifier and the important findings, listen and share Regional Director Scott Richman's [From the Frontlines podcast](#) featuring an interview with ADL's Center for Technology and Society Director of Strategy and Operations.

Ukraine Crisis: Resources and What You Can Do

ADL condemns in the strongest terms Russia's unprovoked invasion of Ukraine and aggression towards the Ukrainian people. This unnecessary war has caused thousands of deaths, is unleashing untold misery on the civilian population, and threatens the independence of Ukraine, a sovereign country and a fellow democracy.

Go to ADL's [Ukraine Crisis](#) section for ways to help organizations doing vital humanitarian work, to advocate for refugees, to learn about Ukraine and its Jewish community and to fight the spread of misinformation about the conflict, including Russian claims that the Ukrainian government and its leaders are "Nazis."
